

CWA SCIENCE CLASSES

Concept With Abhishek | Class 11 — Maths

Chapter 1: Sets

1. A set is a well-defined collection of distinct objects, denoted by capital letters; elements are denoted by small letters.
2. Representation of Sets: Roster/Tabular form and Set-builder form.
3. Types of Sets: Empty set, Finite set, Infinite set, Equal sets, Equivalent sets, Subset, Power set, Universal set.
4. Venn Diagrams: Pictorial representation of sets using circles inside a rectangle (universal set).
5. Operations on Sets: Union ($A \cup B$), Intersection ($A \cap B$), Difference ($A - B$), Complement (A').
6. Important Laws: Commutative, Associative, Distributive laws & De Morgan's Laws: $(A \cup B)' = A' \cap B'$, $(A \cap B)' = A' \cup B'$.
7. Cardinal number of a set: number of distinct elements in a finite set, denoted $n(A)$.
